Pop Up Professional Development Opportunities

Because early learning staff may be facing new challenges in classrooms, Pop Up Professional Development is being offered to support implementation of new practices so that staff are equipped to provide the best possible care for children as they return to your program.

Let it Flow! Routines, Schedules, and Transitions
Because routines, transitions, and schedules are important tools in minimizing challenging behavior, we want to offer professional development, materials, and resources so that you can make changes in the classroom to help children flow from one activity to the next with ease!

You are THEIR Sunshine!
Because we know that child care settings are the safe place for many children who may be experiencing abuse or neglect we want to give educators the tools to recognize, report and help prevent child abuse so that children are safer in all aspects of their lives.

Be an Early Intervention Hero
Because early intervention is critical for a child’s development, we want to give you the skills to identify potential issues early so that you can give kids what they need to get back on track.

Learn and Grow Outside
Because there are many outdoor learning opportunities, join us in learning inspiring ways to grow your outdoor environment so that children can experience quality teacher-child engagement during outside play supporting exploration.

You’ve got the Heart to go PRO!
During COVID-19, you may have not had the opportunity to focus on your own professionalism. Meet and collaborate with other professionals, share your victories and explore opportunities with T.E.A.C.H. so that you can be YOUR best professional self.

Coping with COVID
Because this is a challenging time, we want to bring providers together, so that you can more successfully handle health and safety recommendations.
