

VPK Flexible School Year Options for VPK Private Providers Webinars

The Florida Department of Education and the Office of Early Learning have announced the availability of additional flexibility, through December 2020, for approved VPK providers for the 2020-21 School Year Program. This is an added feature to in-person instruction, but not a replacement.

OEL is hosting a series of webinars to support private providers in the development and submission of a private provider’s plan for delivering the VPK School Year Program, if opting to apply to use a **flexible, innovative delivery option**.

This flexibility will ensure that:

- VPK programs are open to enable learning to continue and allow parents able to rejoin the workforce.
- Choices for VPK parents that mirror those choices that K-12 parents now have via approved District Plans for Reopening.
- Structure safeguards that will encourage and shift families to in-person learning.
